

THE MAINTENANCE PROGRAM

Imagine a journey into the past, to the imposing fortified churches of Transylvania, which have proudly defined the landscape for over 800 years. These impressive buildings are not only historical witnesses of an eventful history, but also living symbols of our cultural identity. But the passage of time left its marks and decay is threatening these valuable monuments. That's why we need your help! With our maintenance program for the fortified churches in Transylvania, we want to ensure that these unique buildings are preserved for future generations to come. Our program focuses on regular maintenance and simple, cost-effective measures to safeguard the condition of the buildings and prevent decay - all without the need for extensive repairs.

What we do:

Our maintenance program includes a variety of measures that are carried out by local castle keepers, with the help of our professional support.

These include: - Vegetation removal: vegetation can damage the masonry. We preserve the building fabric through regular removal.

- Replacing damaged or missing roof tiles: an intact roof protects the entire structure from natural damage. Cleaning gutters and downpipes: Functioning rain water drainage systems prevent moisture damage.

- Protection against vandalism and securing doors and windows: regular inspections help to detect and document damage at an early stage.

How you can help:

All these measures are funded entirely by donations. Any support - no matter how small - helps to save the fortified churches of Transylvania from decay and keep their history alive. Together we can ensure that these cultural treasures can continue to be admired and experienced in the future. Your donation will enable us to work continuously with experts, carry out the necessary works and to preserve the cultural heritage of Transylvania. Let us set an example together and take responsibility for our history.

Become part of our mission:

Donate today and help us to preserve the fortified churches of Transylvania for years to come. Every contribution is a valuable building block for the preservation of our past.
